GEVEKO MARKINGS

Make playtime count

Being physically active benefits our health, well-being, and learning abilities. It, therefore, makes sense to integrate it into our daily lives from a young age. And what better place to start encouraging an active lifestyle than at school where children spend most of their day?

Markings that keep you moving

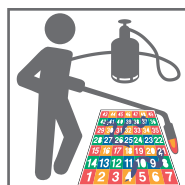

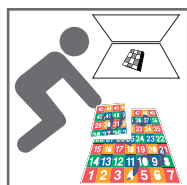

Dark and boring playgrounds are not inspiring for children to play on. So why not brighten up such spaces with colourful and creative markings to make the schoolyard or public space something special? Our DecoMark™ materials provide a quick and easy solution for a wide range of fun games that encourage physical activity and learning among children and young souls of all ages.

Active learning for everyone

Our preformed thermoplastic games can be a fun and alternative way of learning how to spell, count or tell time, for example. With a range that includes hopscotches, sports fields, number tables, and traffic playgrounds, we guarantee that there is something for everyone – and if not, we can custom-design it to fit your exact need.

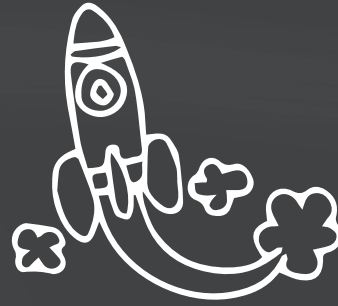

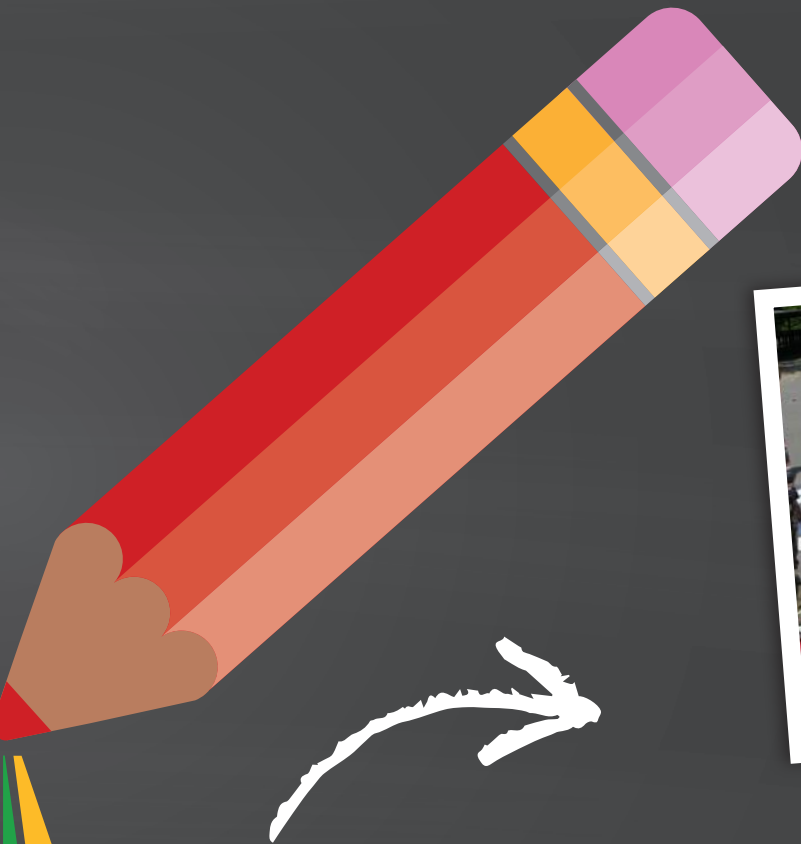

“A school that constantly strengthens its capacity as a healthy setting for living, learning and working”.

The World Health Organisation's definition of a health promoting school.

Application is fast and easy as it requires only one person, a broom and a heat torch! Simply sweep off the surface, apply the material and use a heat torch to secure the material to the road surface. It's that simple!

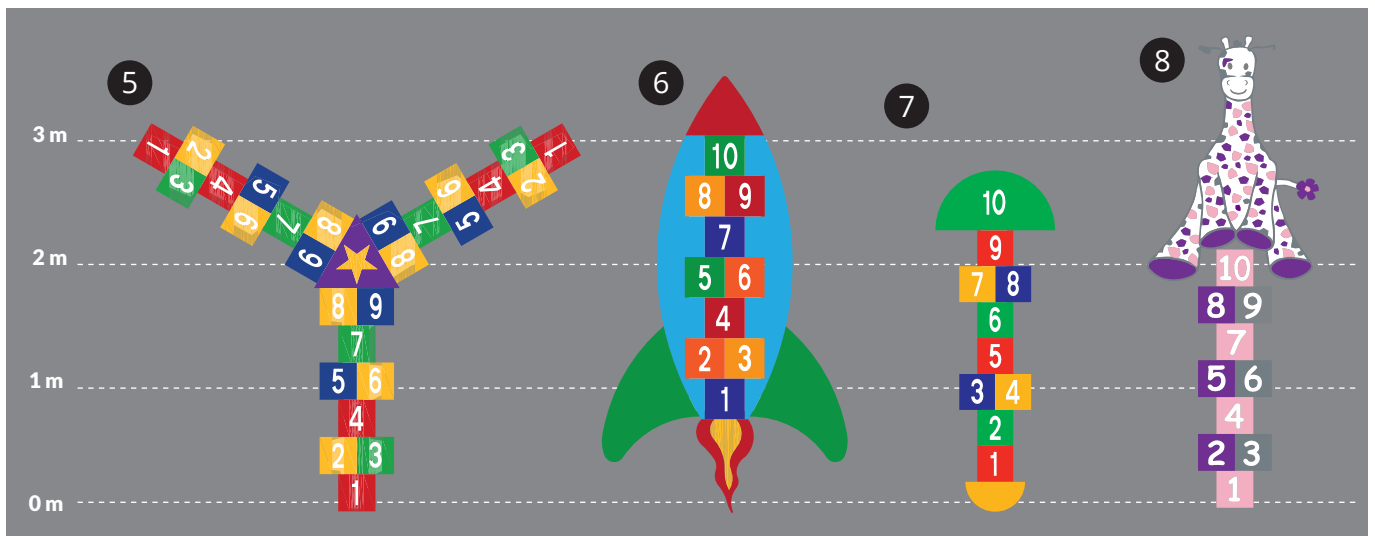

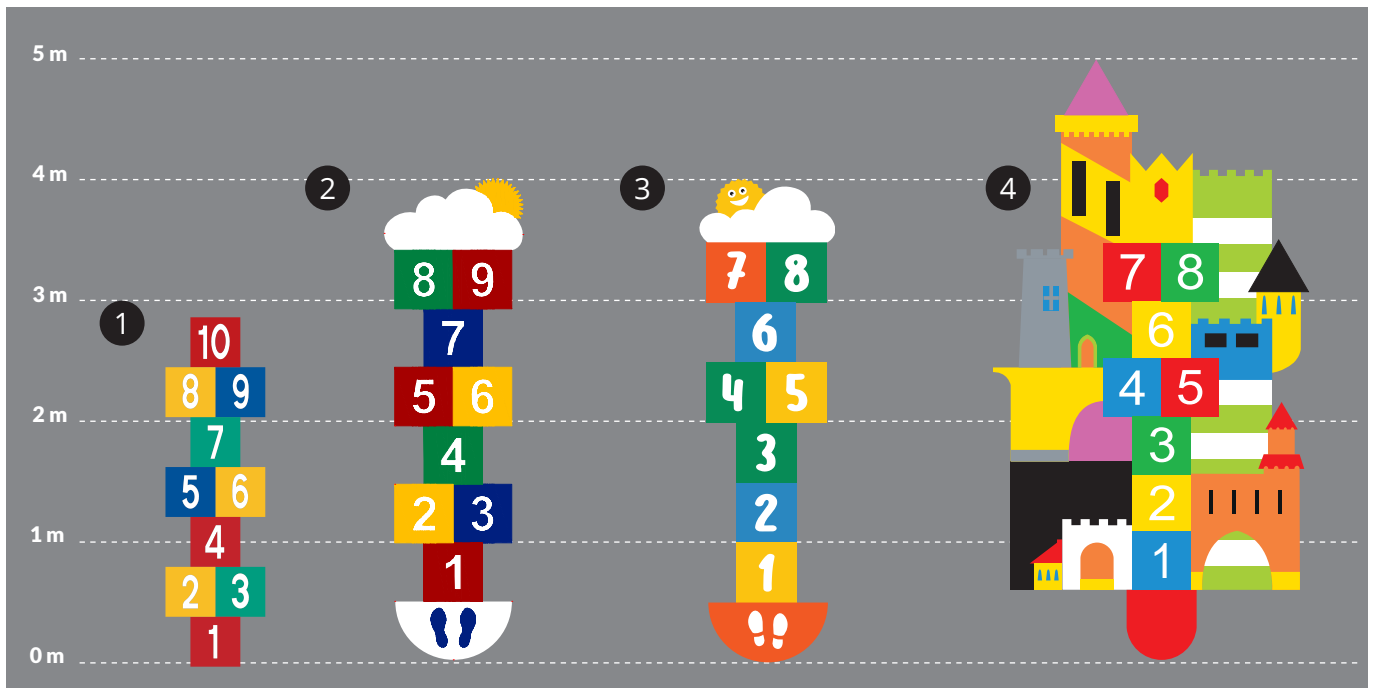

Though specialised equipment is not necessary, you can optimise the performance of your preformed material by using the QL2™ Pro heat torch.

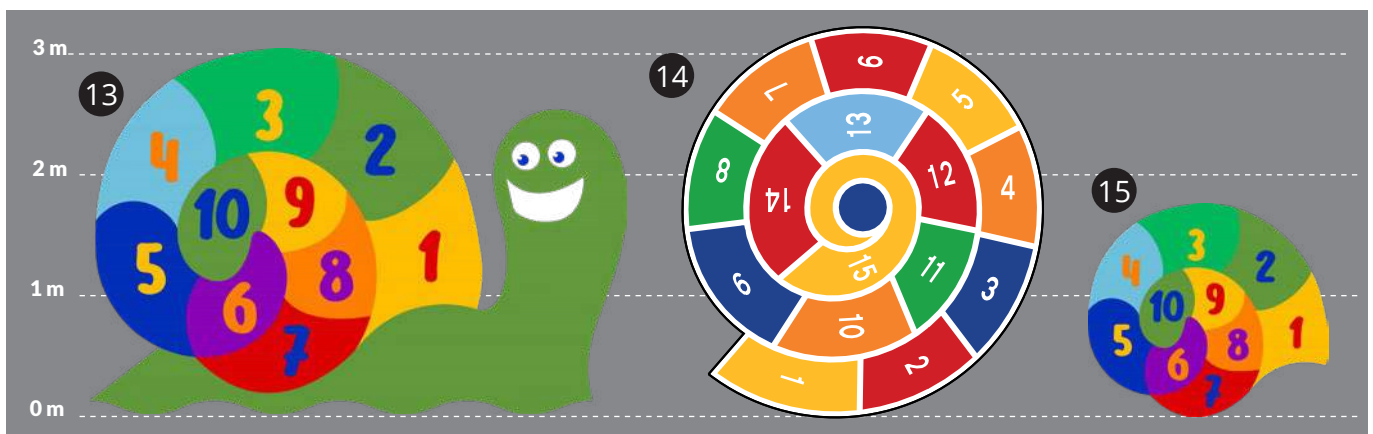

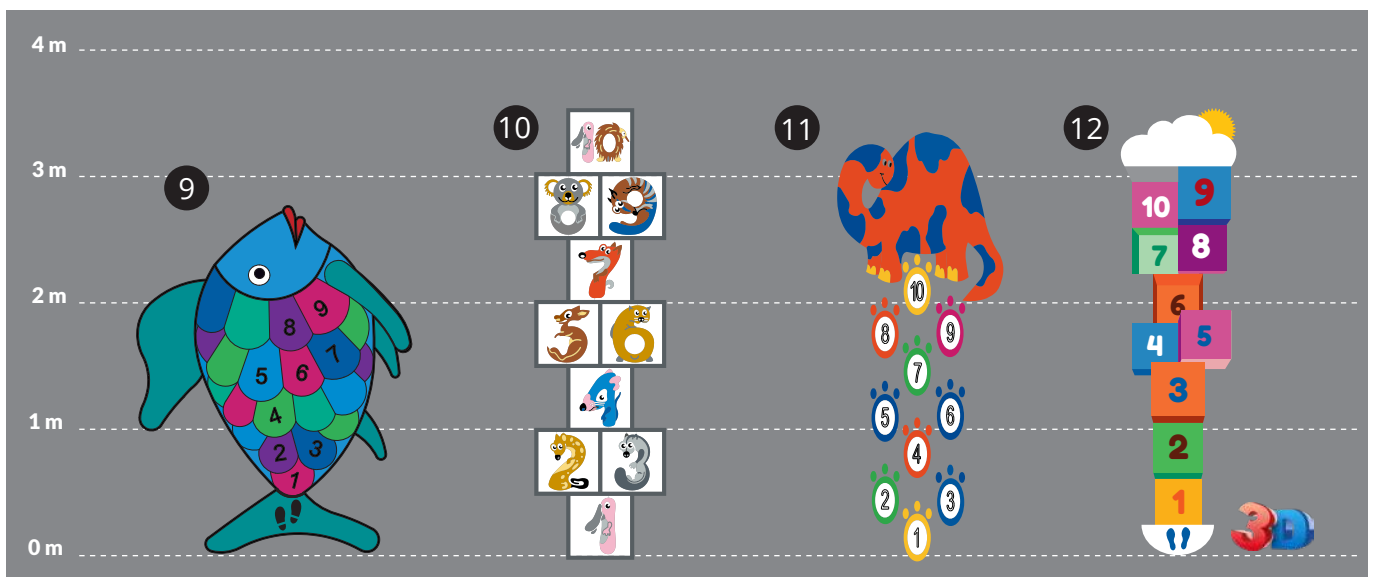

Why choose DecoMark™?

- 1. No need to constantly use chalk to draw up games when you can get a permanent marking that lasts.** The special composition of DecoMark provides high UV resistance which makes the colours stay brighter for longer regardless of weather conditions and frequency of use.
- 2. Minimise the environmental impact.** DecoMark is made with organic pigments and doesn't contain any lead, or other heavy metals, making it safe for everyone to use and play on.
- 3. Save application time on complicated signs.** With the patented DecoMark Easy system, the individual pieces of the marking are glued together on the reverse of the material, giving you perfect control over complex markings.
- 4. Reduce the risk of slip-and-fall accidents.** DecoMark is a thin, flexible, and high-friction material which helps minimise the risk of slippery surfaces making it a safe place for the children to play.

DecoMark™ Bend & Shape

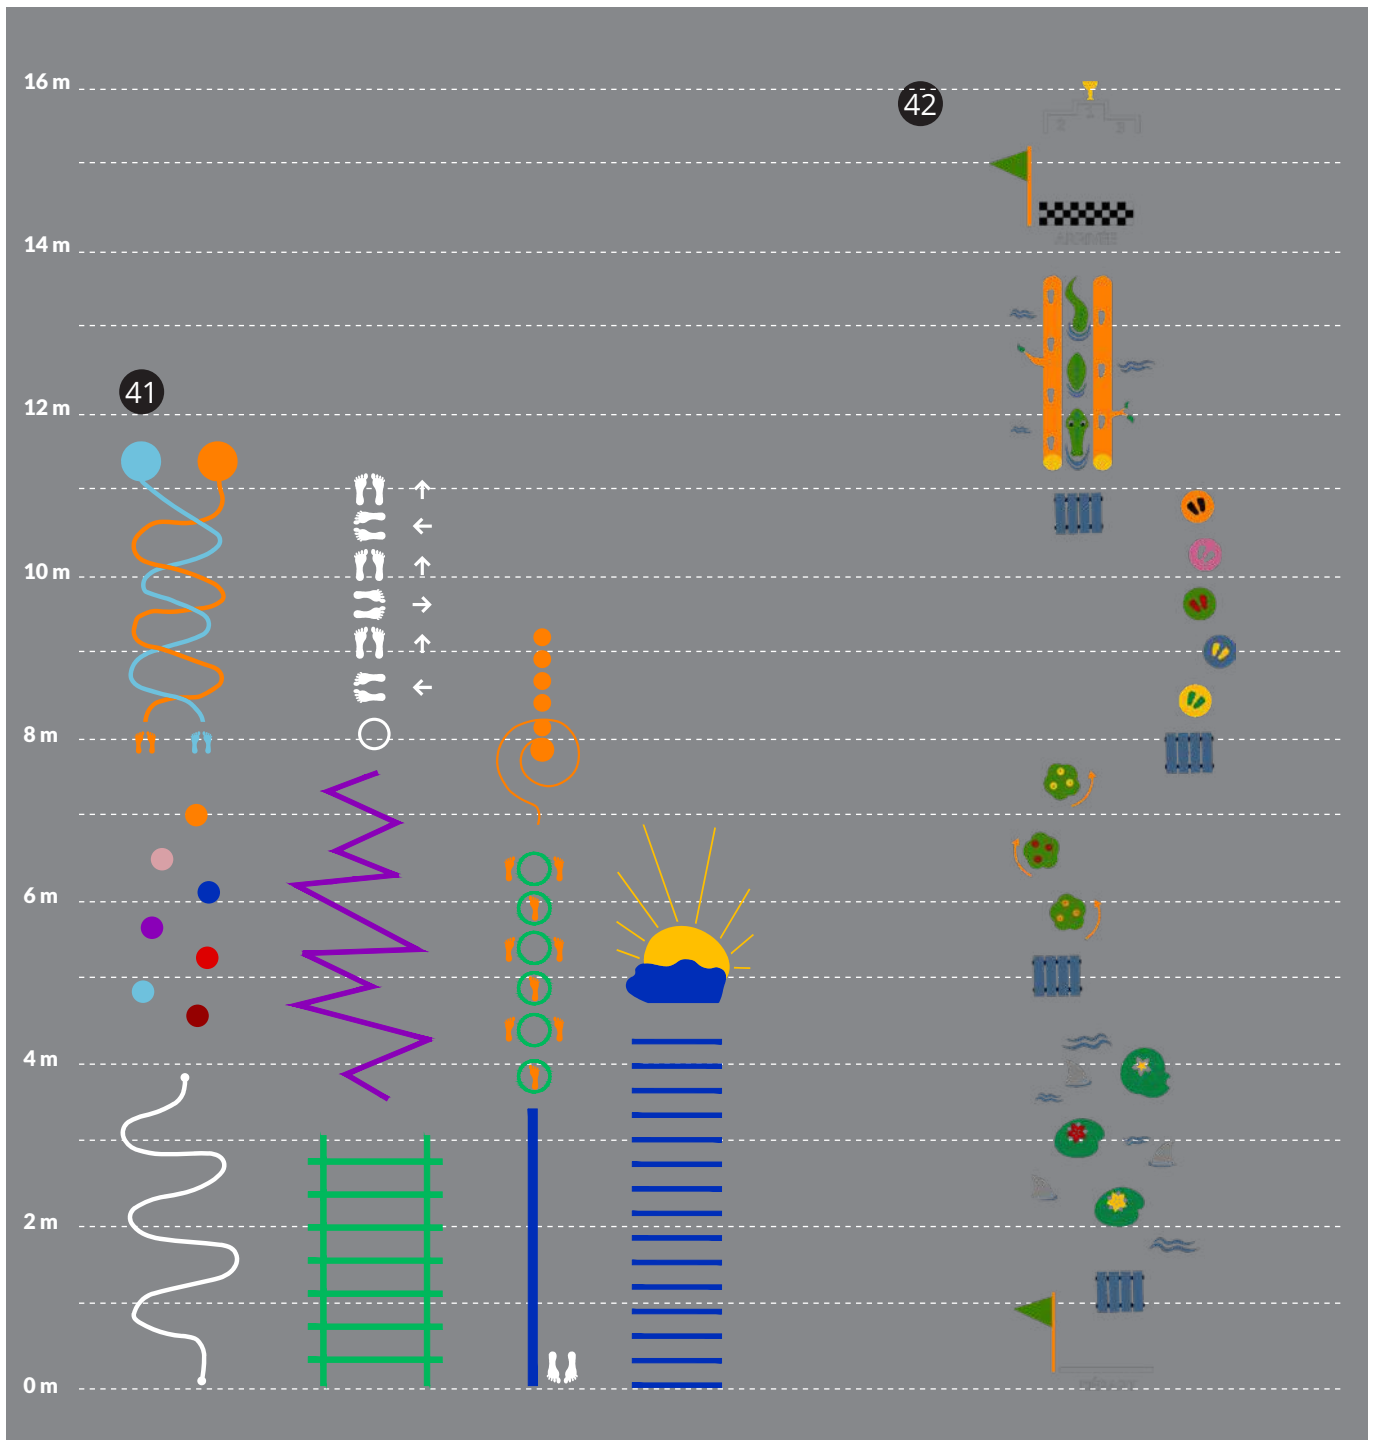

If you are looking for a simple solution for creating your own unique playground designs, DecoMark™ Bend & Shape may very well be the answer. These flexible preformed lines are easy to manipulate into the required shape. This makes it possible to create circular designs and curves that can be used on their own or added to other DecoMark games and symbols.

- Benefit from all the well-known DecoMark properties in this highly flexible version which ideal for cutting into decorative shapes and symbols.
- Quickly refresh playground areas with the easily manipulated preformed lines, that are simply fixed in place with the use of a heat torch.

Traffic Playgrounds in schools and public spaces

'Bicycle playgrounds' are spaces dedicated to learning about cycling in a fun and engaging way. They provide a safe place for theoretical and practical teaching on cycling, from knowing how to pedal, to properly using public roads.

Mainly aimed at children, they can also accommodate adult learners, people with special needs, the elderly, and anyone else who may feel insecure riding on the road without appropriate training.

Usually consisting of an outdoor track, with the appropriate street layout, road signs, and landscaping appropriate for the local context, they can be complemented by indoor spaces to store loan bicycles or provide classroom teaching.

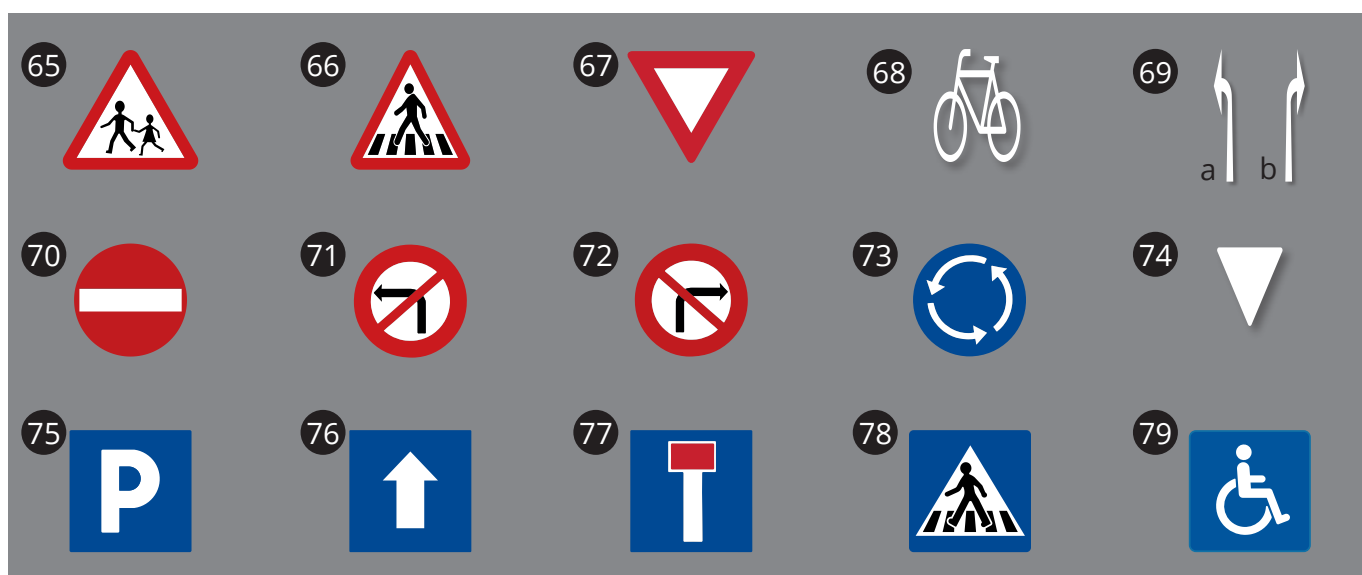

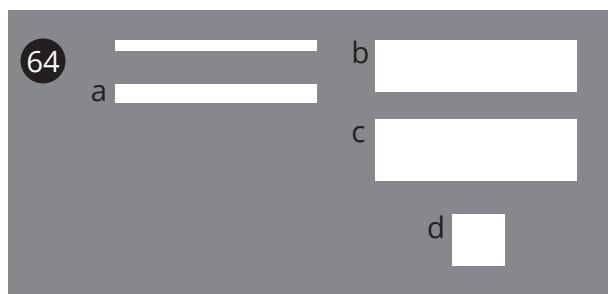

By using scaled-down versions of existing facilities for pedestrians and cyclists, users are allowed to familiarise themselves with real-world scenarios in complete safety, before having to face real traffic.

Key Features

1. Local street and junction designs including clear, reflective or high contrast road markings which show real-world scenarios.
2. Local street signs and road markings, such as stop signs or pedestrian crossing.
3. Common obstacles such as bus stops, car doors, tram tracks, or cobblestones.
4. Coloured slip-resistant area markings to provide orientation, destinations and meeting places for children.
5. Preformed horizontal pictograms of cars or lorries to practice overtaking and braking.
6. Specific road layouts, for practicing motor skills and maneuvers.
7. Traffic lights, if electricity allows, or otherwise manually operated signs which encourage play and engagement.
8. Storage for teaching equipment and loan bicycles.
